

Meet the architects behind some of Toronto's most beautiful buildings and find out what happens behind the scenes in studios all over the city. Explore the architects' workspace for an inside look into how buildings and spaces are designed. See a range of offices from small to large, in renovated garages, storefront spaces and office towers to get a unique perspective on the design process and to see firsthand how architects can have an impact on our lives through the built environment.

Architects' Studio Tour presented by  
Toronto Society of Architects
