

Len Guchardi

Councillor Candidate in the Town of Shelburne
Dufferin County

The following answers were provided by the candidate in response to [a letter sent by the Toronto Society of Architects on September 20, 2022](#) outlining three questions related to issues of the built environment. Answers have been copied and pasted into this page for clarity and ease of access, but all answers are verbatim and no changes or edits have been made.

Q1: Housing is a fundamental human right, and yet an increasing number of residents across the Greater Toronto Area are struggling to pay rent or find an affordable place to live. What policies and actions do you believe need to be implemented to address this crisis?

A: Attainable Housing legislation to ensure that everyone has a chance at a place to live. Municipalities should offer incentives to Developers to build attainable housing units.

Q2: The design, construction and operation of our built environment accounts for nearly 40% of energy related carbon emissions, contributing to the ongoing climate crisis affecting us today. What do you believe needs to be prioritised to reduce carbon emissions within the built environment?

A: Prioritize building communities instead of units...make them energy efficient and include alternate power sources. ie heat recovery, geothermal, solar options.

Q3: In towns and cities, so much of life happens in the shared public spaces—in our parks, libraries and streets. How can we ensure these civic spaces achieve design excellence in their initial conception and construction, and that they are properly maintained so they may continue to serve future generations?

A: Excellent question...I don't have an answer at this time.
